Casey Barton

Honolulu, HI · (808) 936-5654 · glacier.equilibrium@gmail.com · github.com/GlacierEQ · casey-barton-glaciereq.vercel.app

PROFILE

Customer-embedded AI systems builder based in Honolulu, remote-first. I earn the technical win the way this role describes it: discovery, POC scoping with named success and exit criteria, demos on real partner data, and deployment architectures that inherit the customer's governance, access controls, and security model.

Three years running an evidence-grade agent control plane in production: agentic AI workflows with evals, tool use, and agent orchestration; typed state transitions; approval gates; fail-closed recovery. Hands-on data work — SQL, Postgres, ingestion/transformation pipelines — and the habit of productionizing every repeatable win into a module, a rail, or an agent.

CORE COMPETENCIES

Engineering: Python · TypeScript · Node.js · SQL · Bash · REST APIs · webhooks · Postgres · Supabase · data ingestion & transformation · GitHub Actions (CI/CD) · containers

AI & Agents: evals · tool use · agent orchestration · LLM-powered prototypes · MCP protocol · function calling · RAG · prompt & context engineering · human-in-the-loop control

Field Craft: POC scoping & definition · technical discovery · demos on live data · deployment architecture · governance inheritance · success/exit criteria · warm handoffs · roadmap feedback from the field

EXPERIENCE

Founder / Applied AI Systems Architect 2023 – Present

GlacierEQ — Honolulu, HI

- Run the technical win end to end across a **1,413-repository** platform: discovery, scoped proof-of-concept with explicit success criteria, demo on live data, deployment architecture — then hand off warm with full context.
- Operate a **989-test** agent control plane with **95/95** verification checks green: typed state transitions, human approval gates, fail-closed recovery — governed agentic AI the way enterprise security reviews demand.
- Built agentic workflows with **evals, tool use, and agent orchestration** in daily practice; integrated **65 MCP connectors** plus APIs, webhooks, and data pipelines across heterogeneous partner-style environments.
- Productionize the repeatable parts: every second and third repetition becomes a module, a rail, or an agent that makes the next engagement faster — the compound-interest pattern this role runs on.
- Spot patterns across engagements and feed them back into the platform: identify gaps, build custom tooling, and turn deployment learnings into roadmap capabilities.
- Hands-on data work: SQL, Postgres, ingestion and transformation design, and data pipelines that hold up under real measurement — the measurement data is the product.

EDUCATION

University of Hawaii at Manoa 2016
Bachelor of Science

AWS Cloud Institute 2025
Cloud Computing program

Colorado State University
Undergraduate coursework

SELECTED PROOF

Job-App Helix — attributable campaign engine

- Composes assessments into campaign-level **GO / NO-GO** with immutable evidence models, stable finding codes, and fail-closed decisions.
- Recovery restricted to contingency evidence declared before reassessment — the engine never silently tunes values until they pass.

GlacierEQ estate — agent systems portfolio

- Durable patterns for claim tracking, evidence boundaries, audit receipts, and human-in-the-loop control across the full estate.
- Connects multiple technical surfaces — agents, APIs, databases — into one coherent, verifiable working system.

SKILLS

Languages: Python · TypeScript · SQL · Bash · JavaScript / Node.js

AI / Agents: evals · tool use · agent orchestration · LLM prototypes · MCP protocol · function calling · RAG · prompt & context engineering

Data & Infra: Postgres · Supabase · REST APIs · webhooks · data pipelines · GitHub Actions · containers

Practice: POC craft · demos on live data · verification gates · audit receipts · idempotent automation · warm handoffs

Evidence boundary: portfolio repositories are independent work. Domain-inspired demonstrations are not claims of company affiliation, production deployment, or certification.
