PROFILE

Applied AI systems architect with 3 years building evidence-grade agent control planes for state and federal work. I design systems where every action is inspectable, bounded, and recoverable — typed state transitions, approval gates, audit receipts.

Strongest where the problem crosses role boundaries. I map the system, build the narrow end-to-end proof, then deepen the components that carry real load.

CORE COMPETENCIES

Engineering: Python · TypeScript · Node.js · SQL · Bash · REST APIs · Supabase · Postgres · Vercel · GitHub Actions (CI/CD)

AI & Agents: MCP protocol · multi-agent orchestration · LLM evaluation harnesses · prompt & context engineering · human-in-the-loop control

Systems: verification gates · audit receipts · idempotent automation · document automation · evidence-bound pipelines

EXPERIENCE

Founder / Applied AI Systems Architect 2023 – Present

GlacierEQ — Honolulu, HI

- Applied-AI systems across a **1,413-repository** estate: agent governance, MCP integrations, context externalization, document workflows, infrastructure modeling.
- Evidence-grade agent control plane (job-app-helix): **989-test** suite, typed state transitions, approval gates, recoverable runs — **95/95** verification checks green.
- Multi-agent orchestration (anthropic-agent-coordinator): deterministic DAG scheduler; production reliability patterns (apex-control-plane): SHA-256 envelopes, idempotency keys, circuit breakers, fail-closed startup.
- Stateful retrieval (unified-memory-mcp): five memory backends federated behind one MCP interface — parallel fan-out, content-hash dedup, provenance on every retrieval.
- Integrated **65 MCP connectors** with claim tracking, evidence boundaries, and idempotent automation.
- Maintain **20+ production repositories** with tests and GitHub Actions across supported Python versions, plus link-integrity and public-repo hygiene gates.

Chief Inspector 2024

Diamond Head Home Inspections — Honolulu, HI

- Led residential inspection operations: field assessments, defect documentation, and client reporting.

EDUCATION

University of Hawaii at Manoa 2016

Bachelor of Science

AWS Cloud Institute 2025
Cloud Computing program

Colorado State University
Undergraduate coursework

SELECTED PROOF

Job-App Helix — attributable campaign engine

- Composes assessments into campaign-level **GO / NO-GO** with immutable evidence models, stable finding codes, and fail-closed decisions.
- Recovery restricted to contingency evidence declared before reassessment — the engine never silently tunes values until they pass.

GlacierEQ estate — agent systems portfolio

- Durable patterns for claim tracking, evidence boundaries, audit receipts, and human-in-the-loop control across the full estate.
- Connects multiple technical surfaces — agents, APIs, databases, cloud — into one coherent, verifiable working system.

SKILLS

Languages: Python · TypeScript · SQL · Bash · JavaScript / Node.js

AI / Agents: MCP protocol · multi-agent orchestration · LLM evaluation · prompt & context engineering

Data & Infra: Supabase · Postgres · Vercel · GitHub Actions · REST APIs

Practice: verification gates · audit receipts · idempotent automation · clear human-facing documentation

Evidence boundary: portfolio repositories are independent work. Domain-inspired demonstrations are not claims of company affiliation, production deployment, or certification.
