Casey Barton

Honolulu, HI · (808) 936-5654 · glacier.equilibrium@gmail.com · github.com/GlacierEQ · casey-barton-glaciereq.vercel.app

PROFILE

Forward-deployed AI systems builder based in Honolulu — already where this posting hires. I embed with the people whose problems I'm solving, own delivery from first prototype to production, and ship software customers adopt and rely on in the field.

Three years running an evidence-grade agent control plane for constrained state and federal work: inspectable state transitions, bounded tool actions, approval gates, recoverable runs. No active clearance; eligible for sponsorship. Open to 25–50% travel; not relocating off-island.

CORE COMPETENCIES

Engineering: Python · TypeScript · Node.js · SQL · Bash · REST APIs · Supabase · Postgres · Vercel · GitHub Actions (CI/CD)

AI & Agents: MCP protocol · multi-agent orchestration · LLM evaluation harnesses · prompt & context engineering · human-in-the-loop control

Deployment: end-to-end delivery · operator-embedded scoping · verification gates · audit receipts · idempotent automation · Linux · containers · networking fundamentals

EXPERIENCE

Founder / Applied AI Systems Architect 2023 – Present

GlacierEQ — Honolulu, HI

- Ship production-grade agent systems end to end across a **1,413-repository** platform: agent governance, MCP integrations, context externalization, document workflows, infrastructure modeling.
- Operate a **989-test** agent control plane — typed state transitions, approval gates, recoverable runs — with **95/95** verification checks green.
- Embedded-style delivery: map the operator's workflow, build the narrow end-to-end proof, then deepen the components that carry real load — the field pattern this role describes.
- Integrated **65 MCP connectors** with claim tracking, evidence boundaries, and idempotent automation — backend systems and data integrations that connect customer environments to a platform and back.
- Serve as the technical point of contact for operators and stakeholders: turn hard system behavior into decisions non-technical clients use the same day.

EDUCATION

University of Hawaii at Manoa 2016

Bachelor of Science

AWS Cloud Institute 2025

Cloud Computing program

Colorado State University

Undergraduate coursework

SELECTED PROOF

Job-App Helix — attributable campaign engine

- Composes assessments into campaign-level **GO / NO-GO** with immutable evidence models, stable finding codes, and fail-closed decisions.
- Recovery restricted to contingency evidence declared before reassessment — the engine never silently tunes values until they pass.

GlacierEQ estate — agent systems portfolio

- Durable patterns for claim tracking, evidence boundaries, audit receipts, and human-in-the-loop control across the full estate.
- Connects multiple technical surfaces — agents, APIs, databases — into one coherent, verifiable working system.

SKILLS

Languages: Python · TypeScript · SQL · Bash · JavaScript / Node.js

AI / Agents: MCP protocol · multi-agent orchestration · LLM evaluation · prompt & context engineering

Data & Infra: Supabase · Postgres · Vercel · GitHub Actions · REST APIs · Linux · containers

Practice: verification gates · audit receipts · idempotent automation · clear human-facing documentation

Evidence boundary: portfolio repositories are independent work. Domain-inspired demonstrations are not claims of company affiliation, production deployment, or certification.
