Scale AI — Public Sector
Forward Deployed Software Engineer (Honolulu, HI)
Posting 4481921005

Dear Scale AI Public Sector team,

I'm a forward-deployed AI systems builder based in Honolulu, applying for the Forward Deployed Software Engineer role on your Public Sector team. I embed on ambiguous, high-stakes workflows and ship production-grade agent systems end to end — scoping with operators, building the narrow proof, then hardening what carries load.

For **3** years I've run an evidence-grade agent control plane: typed state transitions, bounded tool actions, approval gates, recoverable runs. The platform spans **1,395** repositories with **65** MCP connectors integrated; the control plane holds **989** tests with **62/62** verification checks green. Every action inspectable, every claim receipted — built like a deployment, not a demo.

Public sector work is where that discipline matters most: systems that must stay inspectable, bounded, and recoverable under real operational pressure. I hold no active clearance and am eligible for sponsorship. I'm in Honolulu, open to travel, and not relocating off-island.

I'd welcome the conversation. Portfolio, code, and proof at the links below.

Sincerely,

Casey Barton
