Casey Barton

Honolulu, HI · (808) 936-5654 · glacier.equilibrium@gmail.com · github.com/GlacierEQ · casey-barton-glaciereq.vercel.app

PROFILE

Forward-deployed AI engineer based in Honolulu. I embed with operators on ambiguous, high-stakes workflows and ship production GenAI systems end to end — retrieval-grounded generation, multi-agent orchestration, evaluation harnesses — from customer scoping to production rollout.

Three years running an evidence-grade agent control plane: typed state transitions, approval gates, audit receipts, recoverable runs. Trusted-advisor motion with technical and non-technical stakeholders; led customer-facing field inspection operations before moving into AI systems. Open to travel; not relocating off-island.

CORE COMPETENCIES

Engineering: Python · TypeScript · Node.js · SQL · Bash · REST APIs · Supabase · Postgres · Vercel · GitHub Actions (CI/CD)

AI & Agents: multi-agent orchestration · RAG pipelines · LLM evaluation harnesses · prompt & context engineering · MCP protocol · human-in-the-loop control

Deployment: production GenAI rollouts · customer-embedded scoping · verification gates · audit receipts · idempotent automation

EXPERIENCE

Founder / Applied AI Systems Architect 2023 – Present

GlacierEQ — Honolulu, HI

- Forward-deployed motion as executable code (Forward-Deployed-Agentic-Powerhouse): DISCOVER→FRAME→BUILD→INTEGRATE→EVALUATE→PROVE→DEPLOY with evidence receipts — map the operator's workflow, build the narrow end-to-end proof, deepen what carries load.
- Stateful retrieval (unified-memory-mcp, mcp-iceberg-mansion): Mem0, Supermemory, Supabase pgvector, Pinecone, and Neo4j federated behind one MCP interface — parallel fan-out, content-hash dedup; retrieval-grounded generation with provenance.
- Multi-agent orchestration (anthropic-agent-coordinator): deterministic DAG scheduler, **62/62** tests green; tool calls proposed for review, never executed blind.
- Evaluation-first delivery (job-app-helix): **989-test** agent control plane; evidence state machine (nominal / recoverable / hard-no-go) with the hard-failure path exiting non-zero and CI asserting it.
- Production reliability (apex-control-plane): SHA-256 transport envelopes, idempotency keys, circuit breakers, dead-letter capture; fail-closed startup.
- Operate a **1,395-repository** applied-AI estate — **65 MCP connectors** integrated with claim tracking and idempotent automation; **20+ production repositories** maintained under test and CI.

Chief Inspector 2024

Diamond Head Home Inspections — Honolulu, HI

- Led residential inspection operations: field assessments, defect documentation, and client reporting — direct customer-facing technical work with non-technical stakeholders.

EDUCATION

University of Hawaii at Manoa 2016
Bachelor of Science

AWS Cloud Institute 2025
Cloud Computing program (brief attendance)

Colorado State University
Undergraduate coursework

SELECTED PROOF

Job-App Helix — attributable campaign engine

- Composes assessments into campaign-level **GO / NO-GO** with immutable evidence models, stable finding codes, and fail-closed decisions.
- Recovery restricted to contingency evidence declared before reassessment — the engine never silently tunes values until they pass.

GlacierEQ estate — agent systems portfolio

- Durable patterns for claim tracking, evidence boundaries, audit receipts, and human-in-the-loop control across the full estate.
- Connects multiple technical surfaces — agents, APIs, databases, cloud — into one coherent, verifiable working system.

SKILLS

Languages: Python · TypeScript · SQL · Bash · JavaScript / Node.js

AI / Agents: multi-agent orchestration · RAG · LLM evaluation · prompt & context engineering

Data & Infra: Supabase · Postgres · Vercel · GitHub Actions · REST APIs

Practice: verification gates · audit receipts · idempotent automation · clear human-facing documentation

Evidence boundary: portfolio repositories are independent work. Domain-inspired demonstrations are not claims of company affiliation, production deployment, or certification. No Databricks-platform or Apache Spark production depth claimed.
